

BS EN ISO 22282-2:2012

BSI Standards Publication

Geotechnical investigation and testing — Geohydraulic testing

Part 2: Water permeability tests in a borehole using open systems

bsi.

...making excellence a habit.™

National foreword

This British Standard is the UK implementation of EN ISO 22282-2:2012. Together with parts 1, 3, 4, 5, and 6 of BS EN ISO 22282, it partially supersedes BS 5930:1999+A2:2010, which is currently being revised in order to remove conflicting material. In the meantime, where conflict arises between these documents, the provisions of BS EN ISO 22282-2:2012 take precedence.

The test given in this standard is included in BS 5930:1999+A2:2010 (Clause 25.4), and conflicting parts are now withdrawn.

The UK participation in its preparation was entrusted by Technical Committee B/526, Geotechnics, to Subcommittee B/526/3, Site investigation and ground testing.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
