

Preparation of steel substrates before application of paints and related products —

**Group B: Methods for the assessment of
surface cleanliness —**

**Part B9: Field method for the
conductometric determination of
water-soluble salts**

ICS 17.040.20; 25.22.10; 87.020

National foreword

This British Standard is the official English language version of EN ISO 8502-9:2000, *Preparation of steel substrates before application of paints and related products — Tests for the assessment of surface of cleanliness — Part 9: Field method for the conductometric determination of water-soluble salts*, including amendment A1:2000, and implements it as the UK national standard. It reproduces verbatim ISO 8502-9:1998. The original BS identifier BS 7079-B9:1998 has been retained for ease of cross-reference.

The UK participation in its preparation was entrusted to Technical Committee STI/21, Surface preparation of steel, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
