

BSI Standards Publication

**Reinforced plastics based on
unsaturated-polyester resins —
Determination of the residual
styrene monomer content, as
well as the content of other
volatile aromatic hydrocarbons,
by gas chromatography**

National foreword

This British Standard is the UK implementation of ISO 4901:2011. It supersedes BS 2782-4:Method 432A:1991, which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee PRI/42, Fibre reinforced thermosetting plastics and prepregs.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
