Mechanical vibration and shock — Experimental determination of mechanical mobility

Part 5: Measurements using impact excitation with an exciter which is not attached to the structure

National foreword

This British Standard is the UK implementation of ISO 7626-5:2019. It supersedes BS 6897-5:1995, which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee GME/21/3, Whole body vibration and shock.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
