

BSI Standards Publication

Ships and marine technology — Pilot ladders

Part 2: Maintenance, use, survey, and inspection

National foreword

This British Standard is the UK implementation of [ISO 799-2:2021](#).

The UK participation in its preparation was entrusted to Technical Committee SME/32, Ships and marine technology - Steering committee.

A list of organizations represented on this committee can be obtained on request to its committee manager.

The UK committee advises users that the UK Maritime and Coastguard Agency considers the instructions in this standard require measures, resources and restrictions that are in excess of the requirements of the International Convention for the Safety of Life at Sea (SOLAS) Convention. The UK committee therefore recommends that users consult the SOLAS Convention when applying this standard.

Contractual and legal considerations

This publication has been prepared in good faith, however no representation, warranty, assurance or undertaking (express or implied) is or will be made, and no responsibility or liability is or will be accepted by BSI in relation to the adequacy, accuracy, completeness or reasonableness of this publication. All and any such responsibility and liability is expressly disclaimed to the full extent permitted by the law.

This publication is provided as is, and is to be used at the recipient's own risk.

The recipient is advised to consider seeking professional guidance with respect to its use of this publication.

This publication is not intended to constitute a contract. Users are responsible for its correct application.
