**Industrial automation systems and  
integration — Product data representation  
and exchange —**

**Part 22:**  
Implementation methods: Standard data  
access interface

*Systèmes d'automatisation industrielle et intégration — Représentation et  
échange de données de produit —*

*Partie 22: Méthodes de mise en application: Interface normalisée d'accès  
aux données*

| Contents                                                         | page |
|------------------------------------------------------------------|------|
| 1 Scope .....                                                    | 1    |
| 2 Normative references .....                                     | 2    |
| 3 Definitions and abbreviations .....                            | 3    |
| 3.1 Terms defined in ISO 10303-1 .....                           | 3    |
| 3.2 Terms defined in ISO 10303-11 .....                          | 3    |
| 3.3 Other definitions .....                                      | 4    |
| 3.3.1 application schema .....                                   | 4    |
| 3.3.2 concurrent access .....                                    | 4    |
| 3.3.3 constraint .....                                           | 4    |
| 3.3.4 current schema .....                                       | 4    |
| 3.3.5 external schema .....                                      | 4    |
| 3.3.6 foreign schema .....                                       | 4    |
| 3.3.7 identifier .....                                           | 4    |
| 3.3.8 implementation class .....                                 | 4    |
| 3.3.9 iterator .....                                             | 4    |
| 3.3.10 native schema .....                                       | 4    |
| 3.3.11 repository .....                                          | 4    |
| 3.3.12 schema instance .....                                     | 4    |
| 3.3.13 SDAI-model .....                                          | 4    |
| 3.3.14 SDAI language binding .....                               | 4    |
| 3.3.15 SDAI schema .....                                         | 5    |
| 3.3.16 session .....                                             | 5    |
| 3.3.17 validation .....                                          | 5    |
| 3.4 Abbreviations .....                                          | 5    |
| 4 SDAI overview .....                                            | 5    |
| 4.1 Data access interfaces .....                                 | 5    |
| 4.2 Operations and the session state .....                       | 5    |
| 4.3 Repositories, schema instances, and SDAI-models .....        | 5    |
| 4.4 Transactions and access modes .....                          | 6    |
| 4.5 The session, data dictionary and managing a population ..... | 7    |
| 4.6 SDAI parameter data schema .....                             | 8    |
| 4.7 Functional specification .....                               | 8    |
| 4.8 SDAI language bindings .....                                 | 9    |
| 4.9 Error handling .....                                         | 10   |
| 5 Fundamental principles .....                                   | 10   |
