Numerical control of machines — Punched tape fixed block format for positioning and straight-cut machining

First edition — 1973-12-01

UDC 681.327.44 : 681.323 : 621.9-52

Ref. No. ISO 1059-1973 (E)

Descriptors : data processing, numerical control, punched tapes, data layout, coding.

Price based on 9 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the Technical Committees were published as ISO Recommendations; these documents are now in the process of being transformed into International Standards. As part of this process, Technical Committee ISO/TC 97, *Computers and information processing*, has received ISO Recommendation R 1059-1969 and found it technically suitable for transformation. International Standard ISO 1059 therefore replaces ISO Recommendation R 1059-1969, which was approved by the Member Bodies of the following countries :

Australia	Iran	Portugal
Belgium	Israel	Spain
Czechoslovakia	Italy	Sweden
Denmark	Japan	Switzerland
Egypt, Arab Rep. of	Netherlands	Turkey
France	New Zealand	United Kingdom
Germany	Poland	U.S.A.

No Member Body expressed disapproval of the Recommendation.
