

INTERNATIONAL STANDARD

ISO
12048

First edition
1994-10-15

Packaging — Complete, filled transport packages — Compression and stacking tests using a compression tester

*Emballages — Emballages d'expédition complets et pleins — Essais de
compression et de gerbage à l'aide d'une machine d'essai de compression*

Reference number
ISO 12048:1994(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 10248 was prepared by Technical Committee ISO/TC 122, *Packaging*, Subcommittee SC 3, *Performance requirements and tests*.

This first edition cancels and replaces ISO 2872:1985 and ISO 2874:1974, which have been technically revised.

Annexes A and B of this International Standard are for information only.
