ISO
1213-1

Second edition
1993-12-01

Solid mineral fuels – Vocabulary –

Part 1:

Terms relating to coal preparation

Combustibles minéraux solides – Vocabulaire –

Partie 1: Termes relatifs à la préparation du charbon

Reference number
ISO 1213-1:1993 (E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 1213-1 was prepared by Technical Committee ISO/TC 27, *Solid mineral fuels*, Sub-Committee SC 1, *Coal preparation, terminology and performance*.

This second edition cancels and replaces the first edition (ISO 1213-1:1982), of which it constitutes a technical revision.

ISO 1213 consists of the following parts, under the general title *Solid mineral fuels – Vocabulary*

- *Part 1: Terms relating to coal preparation*
- *Part 2: Terms relating to sampling testing and analysis.*

Annex A of this part of ISO 1213 is for information only.
