Descriptors : starches, vocabulary, classifications/Descripteurs : amidon, vocabulaire, classification.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 1227 was developed by Technical Committee ISO/TC 93, *Starch (including derivatives and by-products)*. It has been approved by the member bodies of the following countries :

Australia	India	Portugal
Austria	Iran	Romania
Brazil	Ireland	South Africa, Rep. of
Bulgaria	Israel	Thailand
Czechoslovakia	Netherlands	Turkey
Egypt, Arab Rep. of	New Zealand	United Kingdom
France	Pakistan	USA
Germany, F.R.	Philippines	Yugoslavia
Hungary	Poland	

The member bodies of the following countries expressed disapproval of the document :

Finland
Greece

This second edition cancels and replaces the first edition (i.e. ISO 1227-1973) and its addenda 1 and 2. It also incorporates draft addendum 3, which was approved by member bodies in 1977 but not published.
