## Characterization of pavement texture by use of surface profiles —

### Part 1: Determination of Mean Profile Depth

*Caractérisation de la texture d'un revêtement de chaussée à partir de  
relevés de profil —*

*Partie 1: Détermination de la profondeur moyenne de la texture*

**ISO 13473-1:1997(E)****Foreword**

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 13473-1 was prepared by Technical Committee ISO/TC 43, *Acoustics*, Subcommittee SC 1, *Noise*.

ISO 13473 consists of the following parts, under the general title *Characterization of pavement texture by use of surface profiles*:

- *Part 1: Determination of Mean Profile Depth*
- *Part 2: Terminology related to pavement texture profile analysis*
- *Part 3: Specifications and classification of profilometers*

Annexes A to F of this part of ISO 13473 are for information only.
