

INTERNATIONAL STANDARD

ISO
14660-2

First edition
1999-10-01

Geometrical Product Specifications (GPS) — Geometrical features —

Part 2:

Extracted median line of a cylinder and
a cone, extracted median surface, local size of
an extracted feature

Spécification géométrique des produits (GPS) — Éléments géométriques —

*Partie 2: Ligne médiane extraite d'un cylindre et d'un cône, surface médiane
extraite, taille locale d'un élément extrait*

Reference number
ISO 14660-2:1999(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 14660-2 was prepared by Technical Committee ISO/TC 213, *Dimensional and geometrical product specifications and verification*.

ISO 14660 consists of the following parts, under the general title *Geometrical product specifications (GPS) — Geometrical features*:

- *Part 1: General terms and definitions*
- *Part 2: Extracted median line of a cylinder and a cone, extracted median surface, local size of an extracted feature*

Annex A of this part of ISO 14660 is for information only.
