Plastics — Determination of flammability characteristics of rigid plastics in the form of small specimens in contact with an incandescent rod

Plastiques — Détermination des caractéristiques d'inflammabilité de plastiques rigides sous forme de petites éprouvettes au contact d'un barreau incandescent

First edition — 1981-12-15

UDC 678.5/.8-40 : 678.01 : 536.495

Ref. No. ISO 181-1981 (E)

Descriptors : plastics, electrical insulating materials, rigid plastics, tests, fire tests, flammability testing, test equipment.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 181 was developed by Technical Committee ISO/TC 61, *Plastics*, and was circulated to the member bodies in May 1977.

It has been approved by the member bodies of the following countries :

Australia	Israel	South Africa, Rep. of
Austria	Italy	Spain
Belgium	Japan	Sweden
Bulgaria	Korea, Rep. of	Switzerland
Canada	Mexico	Turkey
Czechoslovakia	Netherlands	United Kingdom
Egypt, Arab Rep. of	New Zealand	USA
France	Peru	USSR
Germany, F. R.	Poland	Yugoslavia
Hungary	Portugal	
Iran	Romania	

The member body of the following country expressed disapproval of the document on technical grounds :

Ireland

This International Standard cancels and replaces ISO Recommendation R 181-1961, of which it constitutes a technical revision.
