ISO
2060

Second edition
1994-12-01

Textiles — Yarn from packages — Determination of linear density (mass per unit length) by the skein method

*Textiles — Fils sur enroulements — Détermination de la masse linéique
(masse par unité de longueur) par la méthode de l'écheveau*

Reference number
ISO 2060:1994(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 2060 was prepared by Technical Committee ISO/TC 38, *Textiles*, Subcommittee SC 5, *Yarn testing*.

This second edition cancels and replaces the first edition ISO 2060:1972, which has been technically revised.

Annexes A and B form an integral part of this International Standard. Annexes C, D and E are for information only.
