

INTERNATIONAL STANDARD

ISO
255

Second edition
1990-11-01

Belt drives — Pulleys for V-belts (system based on datum width) — Geometrical inspection of grooves

*Transmissions par courroies — Poulies à gorges pour courroies
trapézoïdales (système basé sur la largeur de référence) — Contrôle
géométrique des gorges*

Reference number
ISO 255:1990(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 255 was prepared by Technical Committee ISO/TC 41, *Pulleys and belts (including veebelts)*.

This second edition cancels and replaces the first edition (ISO 255:1981), of which it constitutes a technical revision.

Annex A forms an integral part of this International Standard. Annex B is for information only.
