## **Mechanical vibration and shock — Evaluation of human exposure to whole-body vibration —**

### **Part 1:** General requirements

*Vibrations et chocs mécaniques — Évaluation de l'exposition des individus  
à des vibrations globales du corps —*

*Partie 1: Exigences générales*

Reference number  
ISO 2631-1:1997(E)

|----------------------------------------------------------------------------------------------------|------|
| 1 Scope .....                                                                                      | 1    |
| 2 Normative references .....                                                                       | 1    |
| 3 Definitions .....                                                                                | 2    |
| 4 Symbols and subscripts .....                                                                     | 2    |
| 4.1 Symbols .....                                                                                  | 2    |
| 4.2 Subscripts .....                                                                               | 2    |
| 5 Vibration measurement .....                                                                      | 4    |
| 5.1 General .....                                                                                  | 4    |
| 5.2 Direction of measurement .....                                                                 | 4    |
| 5.3 Location of measurement .....                                                                  | 4    |
| 5.4 General requirements for signal conditioning .....                                             | 5    |
| 5.5 Duration of measurement .....                                                                  | 5    |
| 5.6 Reporting of vibration conditions .....                                                        | 5    |
| 6 Vibration evaluation .....                                                                       | 5    |
| 6.1 Basic evaluation method using weighted<br>root-mean-square acceleration .....                  | 5    |
| 6.2 Applicability of the basic evaluation method .....                                             | 6    |
| 6.3 Additional evaluation of vibration when the basic evaluation<br>method is not sufficient ..... | 6    |
| 6.4 Frequency weighting .....                                                                      | 10   |
| 6.5 Combining vibrations in more than one direction .....                                          | 12   |
| 6.6 Guide to the use of the vibration evaluation methods .....                                     | 13   |
| 7 Health .....                                                                                     | 13   |
| 7.1 Application .....                                                                              | 13   |
| 7.2 Evaluation of the vibration .....                                                              | 13   |
| 7.3 Guidance on the effects of vibration on health .....                                           | 14   |
| 8 Comfort and perception .....                                                                     | 14   |
| 8.1 Application .....                                                                              | 14   |
| 8.2 Comfort .....                                                                                  | 14   |
| 8.3 Perception .....                                                                               | 16   |
| 8.4 Guidance on the effects of vibration on perception<br>and comfort .....                        | 16   |
| 9 Motion sickness .....                                                                            | 16   |
| 9.1 Application .....                                                                              | 16   |
| 9.2 Evaluation of the vibration .....                                                              | 17   |
