UDC 681.3.04 : 53.081

Ref. No. ISO 2955-1983 (E)

Descriptors : data processing, units of measurement, SI units, symbols, representation.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 2955 was developed by Technical Committee ISO/TC 97, *Information processing systems*, and was circulated to the member bodies in October 1980.

It has been approved by the member bodies of the following countries :

Australia	Ireland	South Africa, Rep. of
Belgium	Italy	Spain
Canada	Japan	Sweden
Cuba	Netherlands	Switzerland
Finland	New Zealand	United Kingdom
France	Poland	USSR
Germany, F. R.	Romania	

No member body expressed disapproval of the document.

This second edition cancels and replaces the first edition (i.e. ISO 2955-1974).
