

INTERNATIONAL STANDARD

ISO
305

Second edition
1990-04-01

Plastics — Determination of thermal stability of poly(vinyl chloride), related chlorine-containing homopolymers and copolymers and their compounds — Discoloration method

*Plastiques — Détermination de la stabilité thermique du poly(chlorure
de vinyle), des homopolymères et copolymères chlorés apparentés et de
leurs compositions — Méthode du changement de couleur*

Reference number
ISO 305:1990(E)

ISO 305:1990(E)**Foreword**

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 305 was prepared by Technical Committee ISO/TC 61, *Plastics*.

This second edition cancels and replaces the first edition (ISO 305:1976), of which it constitutes a technical revision.
