

INTERNATIONAL STANDARD

**ISO
3507**

Second edition
1999-04-15

Laboratory glassware — Pyknometers

Verrerie de laboratoire — Pycnomètres

Reference number
ISO 3507:1999(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

International Standard ISO 3507 was prepared by Technical Committee ISO/TC 48, *Laboratory glassware and related apparatus*, Subcommittee SC 4, *Density measuring instruments*.

This second edition cancels and replaces the first edition (ISO 3507:1976) by incorporating the following changes:

- a) the title has been modified;
- b) Gay-Lussac pyknometers of 1 ml, 2 ml, 5 ml and 100 ml have been added;
- c) Reischauer pyknometers of 10 ml and 100 ml have been added;
- d) a Hubbard pyknometer of 50 ml has been added;
- e) pyknometers with ground-in thermometer and capillary side tube have been added.
