Steel tubes and fittings — Symbols for use in specifications —

Part 1:

**Tubes and tubular accessories with circular
cross-section**

Tubes et raccords en acier — Symboles à utiliser dans les spécifications —

Partie 1: Tubes et accessoires de forme tubulaire à section circulaire

Reference number
ISO 3545-1 : 1989 (E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council. They are approved in accordance with ISO procedures requiring at least 75 % approval by the member bodies voting.

International Standard ISO 3545-1 was prepared by Technical Committee ISO/TC 5, *Ferrous metal pipes and metallic fittings*.

This first edition of ISO 3545-1 cancels and replaces ISO 3545 : 1981 of which it constitutes a minor revision.

ISO 3545 consists of the following parts, under the general title *Steel tubes and fittings* — *Symbols for use in specifications*:

- *Part 1: Tubes and tubular accessories with circular cross-section*
- *Part 2: Square and rectangular hollow sections*
- *Part 3: Tubular fittings with circular cross-section*
