Ref. No. ISO 3587-1976 (E)

Descriptors : glassware, piping, pipes (tubes), glass tubes, pipe fittings, glass fittings, equipment, specifications, dimensions, compatibility, interchangeability.

Price based on 17 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3587 was drawn up by Technical Committee ISO/TC 128, *Glass plant, pipeline and fittings*, and circulated to the Member Bodies in November 1974.

It has been approved by the Member Bodies of the following countries :

Austria	Italy	Turkey
Bulgaria	Romania	United Kingdom
Czechoslovakia	South Africa, Rep. of	U.S.A.
France	Spain	U.S.S.R.
Germany	Switzerland	

No Member Body expressed disapproval of the document.
