Starch — Determination of ash

Amidons et fécules — Détermination des cendres

Second edition — 1981-10-01

UDC 664.2 : 543.822

Ref. No. ISO 3593-1981 (E)

Descriptors : starch, determination of ash.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3593 was developed by Technical Committee ISO/TC 93, *Starch (including derivatives and by-products)*.

This second edition was submitted directly to the ISO Council, in accordance with clause 5.10.1 of part 1 of the Directives for the technical work of ISO. It cancels and replaces the first edition (i.e. ISO 3593-1976), which had been approved by the member bodies of the following countries :

Chile	Netherlands	United Kingdom
Czechoslovakia	Poland	USSR
France	Romania	Yugoslavia
Germany, F. R.	Spain	
Iran	Turkey	

The member bodies of the following countries had expressed disapproval of the document on technical grounds :

Australia
USA
