

INTERNATIONAL STANDARD

ISO
4038

Third edition
1996-02-15

Road vehicles — Hydraulic braking systems — Simple flare pipes, tapped holes, male fittings and hose end fittings

*Véhicules routiers — Dispositifs de freinage hydraulique — Tuyauteries à
simple renflement, logements, raccords mâles et embouts de flexibles*

Reference number
ISO 4038:1996(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 4038 was prepared by Technical Committee ISO/TC 22, *Road vehicles*, Subcommittee SC 2, *Brake systems and equipment*.

This third edition cancels and replaces the second edition (ISO 4038:1984), which has been technically revised.

Annex A of this International Standard is for information only.
