Machines de bureau — Informations minimales à inclure dans les fiches techniques — Partie 3: Machines postales à affranchir

First edition — 1984-07-15

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 4232/3 was developed by Technical Committee ISO/TC 97, *Information processing systems*, and was circulated to the member bodies in December 1982.

It has been approved by the member bodies of the following countries :

Australia	Hungary	Spain
Belgium	Ireland	Sweden
Egypt, Arab Rep. of	Italy	Switzerland
France	Japan	United Kingdom
Germany, F.R.	Netherlands	

The member body of the following country expressed disapproval of the document on technical grounds :

USA
