

INTERNATIONAL STANDARD

ISO
4249-2

Second edition
1990-02-15

Motorcycle tyres and rims (Code-designated series) —

Part 2: Tyre load ratings

Pneumatiques et jantes pour motocycles (Séries dont les dimensions sont désignées par des codes) —

Partie 2: Capacités de charge des pneumatiques

Reference number
ISO 4249-2 : 1990 (E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council. They are approved in accordance with ISO procedures requiring at least 75 % approval by the member bodies voting.

International Standard ISO 4249-2 was prepared by Technical Committee ISO/TC 31, *Tyres, rims and valves*.

This second edition cancels and replaces the first edition (ISO 4249-2 : 1983) and its Amendment 1 (ISO 4249-2 : 1983/Amendment 1 : 1984), tables 2 and 4, and the footnote to table 3 of which have been technically revised (in Draft Amendment 2 and Amendment 1 of 1984 respectively).

ISO 4249 consists of the following parts, under the general title *Motorcycle tyres and rims (Code-designated series)*:

- *Part 1: Tyres*
- *Part 2: Tyre load ratings*
- *Part 3: Rims*
