

INTERNATIONAL STANDARD

**ISO
4402**

Second edition
1991-10-15

Hydraulic fluid power — Calibration of automatic-count instruments for particles suspended in liquids — Method using classified AC Fine Test Dust contaminant

*Transmissions hydrauliques — Étalonnage des compteurs automatiques
de particules en suspension dans les liquides — Méthode utilisant une
fine poussière d'essai (ACFTD)*

Reference number
ISO 4402:1991(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 4402 was prepared by Technical Committee ISO/TC 131, *Fluid power systems*, Sub-Committee SC 8, *Product testing and contamination control*.

This second edition cancels and replaces the first edition (ISO 4402:1977), table 3 of which has been technically revised.
