441

Second edition
1997-01-15

Textile machinery and accessories — Drop wires for warp stop motions for weaving machines without automatic drawing-in

*Matériel pour l'industrie textile — Lamelles pour casse-chaînes pour
machines à tisser sans rentrée automatique des lamelles*

Reference number
ISO 441:1997(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 441 was prepared by Technical Committee ISO/TC 72, *Textile machinery*, Subcommittee SC 3, *Machinery for fabric manufacture*.

This second edition cancels and replaces the first edition (ISO 441-1978), which has been technically revised.
