Machines à coudre domestiques (ou de ménage) — Détermination de la fiabilité du réglage de la longueur de point

First edition — 1983-11-15

UDC 687.053

Ref. No. ISO 4819-1983 (E)

Descriptors : household appliances, sewing machines, tests, materials specifications.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 4819 was developed by Technical Committee ISO/TC 148, *Sewing machines*, and was circulated to the member bodies in August 1982.

It has been approved by the member bodies of the following countries :

China	Italy	United Kingdom
Czechoslovakia	South Africa, Rep. of	USSR
Egypt, Arab Rep. of	Spain	Yugoslavia
Germany, F. R.	Sweden	
India	Switzerland	

The member body of the following country expressed disapproval of the document on technical grounds :

Poland
