UDC 621.51 : 614.8

Ref. No. ISO 5388-1981 (E)

Descriptors : air compressors, construction, installing, operating requirements.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 5388 was developed by Technical Committee ISO/TC 118, *Compressors, pneumatic tools and pneumatic machines*, and was circulated to the member bodies in August 1978.

It has been approved by the member bodies of the following countries :

Australia	France	Netherlands
Austria	Germany, F.R.	Poland
Belgium	India	Romania
Brazil	Ireland	Sweden
Czechoslovakia	Korea, Dem. P. Rep. of	United Kingdom
Finland	Mexico	

The member bodies of the following countries expressed disapproval of the document on technical grounds :

South Africa, Rep. of
USA
