

INTERNATIONAL STANDARD

ISO
565

Third edition
1990-07-15

Test sieves — Metal wire cloth, perforated metal plate and electroformed sheet — Nominal sizes of openings

*Tamis de contrôle — Tissus métalliques, tôles métalliques perforées et
feuilles électroformées — Dimensions nominales des ouvertures*

Reference number
ISO 565:1990(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 565 was prepared by Technical Committee ISO/TC 24, *Sieves, sieving and other sizing methods*.

This third edition cancels and replaces the second edition (ISO 565:1983), of which it constitutes a technical revision (see the Introduction).

Annex A of this International Standard is for information only.
