Inorganic chemical products for industrial use — General method for determination of chloride content — Mercurimetric method

Produits chimiques inorganiques à usage industriel — Méthode générale de dosage des chlorures — Méthode mercurimétrique

First edition — 1979-07-15

AUG 13 1979

UDC 661.2/.6 : 546.131 : 543.242

Ref. No. ISO 5790-1979 (E)

Descriptors : inorganic compounds, chemical analysis, determination of content, chlorides, mercurimetric analysis.

Price based on 9 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 5790 was developed by Technical Committee ISO/TC 47, *Chemistry*, and was circulated to the member bodies in June 1977.

It has been approved by the member bodies of the following countries :

Austria	Germany, F.R.	Poland
Belgium	Hungary	Romania
Brazil	India	South Africa, Rep. of
Bulgaria	Israel	Switzerland
Chile	Italy	Turkey
Czechoslovakia	Kenya	United Kingdom
Egypt, Arab Rep. of	Korea, Rep. of	USSR
France	New Zealand	Yugoslavia

No member body expressed disapproval of the document.
