Plastics — Unsaturated polyester resins — Determination of reactivity at 80 °C (conventional method)

Plastiques — Résines de polyesters non saturés — Détermination conventionnelle de la réactivité à 80 °C

First edition — 1982-12-01

UDC 678.674 : 543.878

Ref. No. ISO 584-1982 (E)

Descriptors : plastics, polyester resins, chemical analysis, determination, chemical reactivity.

Price based on 3 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 584 was developed by Technical Committee ISO/TC 61, *Plastics*, and was circulated to the member bodies in July 1980.

It has been approved by the member bodies of the following countries :

Australia	Hungary	New Zealand
Austria	India	Poland
Canada	Iran	Romania
China	Ireland	South Africa, Rep. of
Czechoslovakia	Israel	Spain
Egypt, Arab Rep. of	Italy	Sweden
Finland	Japan	USA
France	Korea, Rep. of	USSR
Germany, F. R.	Netherlands	

The member bodies of the following countries expressed disapproval of the document on technical grounds :

Belgium
United Kingdom

This International Standard cancels and replaces ISO Recommendation R 584-1967 of which it constitutes a technical revision.
