Gas analysis — Preparation of calibration gas mixtures — Manometric method

Analyse des gaz — Préparation des mélanges de gaz pour étalonnage — Méthode par voie manométrique

First edition — 1979-05-01

UDC 543.27 : 53.089.68

Ref. No. ISO 6146-1979 (E)

Descriptors : gases, gas mixtures, chemical analysis, gas analysis, test specimen conditioning, manometric methods.

Price based on 19 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 6146 was developed by Technical Committee ISO/TC 158, *Analysis of gases*, and was circulated to the member bodies in November 1977.

It has been approved by the member bodies of the following countries :

Australia	Ireland	Spain
Belgium	Mexico	Turkey
Czechoslovakia	Netherlands	USA
Egypt, Arab Rep. of	Philippines	USSR
France	Poland	Yugoslavia
Germany, F. R.	Romania	
India	South Africa, Rep. of	

The member body of the following country expressed disapproval of the document on technical grounds :

United Kingdom
