Plastics — Film and sheeting — Determination of tear resistance — Part 2: Elmendorf method

Plastiques — Film et feuille — Détermination de la résistance au déchirement — Partie 2: Méthode Elmendorf

First edition — 1983-09-01

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 6383/2 (formerly ISO/DIS 6824) was developed by Technical Committee ISO/TC 61, *Plastics*, and was circulated to the member bodies in February 1980.

It has been approved by the member bodies of the following countries :

Australia	Germany, F.R.	Philippines
Austria	Hungary	Poland
Belgium	India	Portugal
Brazil	Ireland	Romania
Canada	Israel	South Africa, Rep. of
China	Italy	Spain
Czechoslovakia	Japan	Switzerland
Egypt, Arab Rep. of	Korea, Rep. of	United Kingdom
Finland	Mexico	USA
France	Netherlands	USSR

The member body of the following country expressed disapproval of the document on technical grounds :

Sweden
