Animal feeding stuffs — Determination of calcium content —

Part 2: Atomic absorption spectrometric method

Aliments des animaux — Détermination de la teneur en calcium — Partie 2: Méthode par spectrométrie d'absorption atomique

First edition — 1983-11-01

UDC 636.085.1 : 543.422 : 546.41

Ref. No. ISO 6490/2-1983 (E)

Descriptors: animal feeding products, tests, determination of content, calcium, atomic absorption spectrometric method.

Price based on 3 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 6490/2 was developed by Technical Committee ISO/TC 34, *Agricultural food products*, and was circulated to the member bodies in July 1982.

It has been approved by the member bodies of the following countries:

Australia	Ireland	Romania
Austria	Israel	South Africa, Rep. of
Canada	Italy	Sri Lanka
Chile	Korea, Rep. of	Tanzania
Egypt, Arab Rep. of	Malaysia	Thailand
Ethiopia	Netherlands	United Kingdom
France	New Zealand	USA
Hungary	Peru	USSR
India	Philippines	Yugoslavia
Iran	Poland	
Iraq	Portugal	

No member body expressed disapproval of the document.
