Enclosed-scale calorimeter thermometers

Thermomètres pour calorimètres à échelle protégée

First edition — 1975-09-01

UDC 536.512.004.1

Ref. No. ISO 652-1975 (E)

Descriptors : laboratory glassware, temperature measuring, calorimeters, specifications, dimensions, marking.

Price based on 3 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the Technical Committees were published as ISO Recommendations; these documents are now in the process of being transformed into International Standards. As part of this process, Technical Committee ISO/TC 48 has reviewed ISO Recommendation R 652 and found it technically suitable for transformation. International Standard ISO 652 therefore replaces ISO Recommendation R 652-1968 to which it is technically identical.

ISO Recommendation R 652 was approved by the Member Bodies of the following countries :

Australia	France	Poland
Austria	Greece	South Africa, Rep. of
Belgium	Hungary	Spain
Brazil	India	Switzerland
Bulgaria	Ireland	Turkey
Canada	Italy	United Kingdom
Chile	Japan	U.S.A.
Colombia	Korea Rep. of	Yugoslavia
Czechoslovakia	Netherlands	
Egypt, Arab Rep. of	New Zealand	

The Member Body of the following country expressed disapproval of the Recommendation on technical grounds :

Germany

No Member Body disapproved the transformation of ISO/R 652 into an International Standard.
