

INTERNATIONAL STANDARD

ISO 657-1

First edition
1989-08-01

Hot-rolled steel sections —

Part 1 : Equal-leg angles — Dimensions

Profilés en acier laminés à chaud —

Partie 1: Cornières à ailes égales — Dimensions

ISO 657-1 : 1989 (E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council. They are approved in accordance with ISO procedures requiring at least 75 % approval by the member bodies voting.

International Standard ISO 657-1 was prepared by Technical Committee ISO/TC 17, *Steel*.

It cancels and replaces ISO Recommendation R 657-1 : 1968, of which it constitutes a technical revision.

ISO 657 consists of the following parts, under the general title *Hot-rolled steel sections*:

- Part 1: *Equal-leg angles — Dimensions*
- Part 2: *Unequal-leg angles — Dimensions*
- Part 5: *Equal-leg angles and unequal-leg angles — Tolerances for metric and inch series*
- Part 6: *Parallel flange sections (metric series) — Dimensions*
- Part 10: *Parallel flange sections — Tolerances*
- Part 11: *Sloping flange channel sections (metric series) — Dimensions and sectional properties*
- Part 13: *Tolerances on sloping flange beam, column and channel sections*
- Part 15: *Sloping flange beam sections (metric series) — Dimensions and sectional properties*
- Part 16: *Sloping flange column sections (metric series) — Dimensions and sectional properties*
- Part 18: *L sections for shipbuilding (metric series) — Dimensions, sectional properties and tolerances*
- Part 19: *Bulb flats (metric series) — Dimensions, sectional properties and tolerances*
- Part 20: *Parallel flange channel sections — Dimensions*
- Part 21: *T-sections with equal depth and flange width — Dimensions*
