Fruits, vegetables and derived products — Determination of lead content — Flameless atomic absorption spectrometric method

Fruits, légumes et produits dérivés — Détermination de la teneur en plomb — Méthode par spectrométrie d'absorption atomique sans flamme

First edition — 1984-09-15

UDC 634.1/635.6 : 543.422 : 546.815

Ref. No. ISO 6633-1984 (E)

Descriptors : agricultural products, fruit and vegetable products, fruits, vegetables, chemical analysis, determination of content, lead, atomic absorption method.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council. They are approved in accordance with ISO procedures requiring at least 75 % approval by the member bodies voting.

International Standard ISO 6633 was prepared by Technical Committee ISO/TC 34, *Agricultural food products*.
