Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 6837 was developed by Technical Committee ISO/TC 91, *Surface active agents*, and was circulated to the member bodies in November 1981.

It has been approved by the member bodies of the following countries:

Australia	Hungary	Romania
Austria	Ireland	South Africa. Rep. of
Belgium	Japan	Spain
China	Korea Rep. of	Switzerland
Egypt, Arab Rep. of	Mexico	USSR
France	Netherlands	
Germany, F.R.	Poland	

No member body expressed disapproval of the document.

This International Standard has also been approved by the International Union of Pure and Applied Chemistry (IUPAC).
