Second edition
1992-12-15

Photography — Black-and-white continuous-tone papers — Determination of ISO speed and ISO range for printing

*Photographie — Papiers noir et blanc pour images à tons continus —
Détermination de la sensibilité ISO et de l'étendue ISO pour le tirage*

Reference number
ISO 6846:1992(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 6846 was prepared by Technical Committee ISO/TC 42, *Photography*.

This second edition cancels and replaces the first edition (ISO 6846:1983), of which it constitutes a technical revision.

Annexes A, B, C and D of this International Standard are for information only.
