Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 6906 was developed by Technical Committee ISO/TC 3, *Limits and fits*, and was circulated to the member bodies in January 1983.

It has been approved by the member bodies of the following countries:

Australia	Hungary	Romania
Belgium	India	South Africa, Rep. of
Canada	Korea, Rep. of	Spain
China	Mexico	Switzerland
France	Netherlands	USA
Germany, F.R.	New Zealand	

The member bodies of the following countries expressed disapproval of the document on technical grounds:

Czechoslovakia	Poland
Italy	United Kingdom
Japan
