Liquefied anhydrous ammonia for industrial use — Determination of water content — Karl Fischer method

Ammoniac anhydre liquéfié à usage industriel — Dosage de l'eau — Méthode de Karl Fischer

First edition — 1985-06-01

UDC 661.51 : 543.712

Ref. No. ISO 7105-1985 (E)

Descriptors : industrial products, chemical compounds, liquid ammonia, chemical analysis, determination of content, water, test equipment, Karl Fischer method.

Price based on 4 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council. They are approved in accordance with ISO procedures requiring at least 75 % approval by the member bodies voting.

International Standard ISO 7105 was prepared by Technical Committee ISO/TC 47, *Chemistry*.
