Descriptors : materials handling equipment, continuous handling, elevators (lifts), bucket conveyors. / **Descripteurs** : matériel de manutention de matériaux, manutention continue, élévateur, transporteur à godets.

Price based on 6 pages/Prix basé sur 6 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 7190 was developed by Technical Committee ISO/TC 101, *Continuous handling mechanical equipment*, and was circulated to the member bodies in July 1980.

It has been approved by the member bodies of the following countries :

Australia	Germany, F. R.	South Africa, Rep. of
Austria	Ireland	Spain
Belgium	Korea, Rep. of	Sweden
Chile	Netherlands	United Kingdom
Czechoslovakia	Norway	USSR
Finland	Poland	
France	Romania	

No member body expressed disapproval of the document.
