

INTERNATIONAL STANDARD

**ISO
7284**

Second edition
1993-07-15

Resistance welding equipment — Particular specifications applicable to transformers with two separate secondary windings for multi-spot welding, as used in the automobile industry

*Matériel de soudage par résistance — Spécifications particulières
applicables aux transformateurs à deux enroulements secondaires séparés
pour soudage multipoints, utilisés dans l'industrie automobile*

Reference number
ISO 7284:1993(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 7284 was prepared by Technical Committee ISO/TC 44, *Welding and allied processes*, Sub-Committee SC 6, *Resistance welding*.

This second edition cancels and replaces the first edition (ISO 7284:1984), table 3 of which has been technically revised so as to be in alignment with IEC values.

Annex A forms an integral part of this International Standard.
