Oils of sassafras and nutmeg — Determination of safrole and *cis*- and *trans*-isosafrole content — Gas chromatographic method on packed columns

*Huiles essentielles de sassafras et de muscade — Détermination de la teneur en safrole et *cis*- et *trans*-isosafrole — Méthode par chromatographie en phase gazeuse sur colonne remplie*

First edition — 1985-12-15

UDC 665.525.6 : 665.525.46 : 543.544

Ref. No. ISO 7355-1985 (E)

Descriptors: essential oils, sassafras, nutmeg, chemical analysis, determination of content, gas chromatography.

Price based on 4 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council. They are approved in accordance with ISO procedures requiring at least 75 % approval by the member bodies voting.

International Standard ISO 7355 was prepared by Technical Committee ISO/TC 54, *Essential oils*.

Users should note that all International Standards undergo revision from time to time and that any reference made herein to any other International Standard implies its latest edition, unless otherwise stated.
