Descriptors : technical drawings, buildings, symbols, marking, graphic symbols.

Price based on 2 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 7518 was developed by Technical Committee ISO/TC 10, *Technical drawings*, and was circulated to the member bodies in January 1982.

It has been approved by the member bodies of the following countries:

Australia	India	South Africa, Rep. of
Austria	Italy	Spain
Belgium	Japan	Sweden
Brazil	Netherlands	Thailand
Canada	New Zealand	USA
China	Poland	USSR
Egypt, Arab Rep. of	Romania	

The member bodies of the following countries expressed disapproval of the document on technical grounds:

Finland
Norway
United Kingdom
