Magnesium and magnesium alloys — Determination of copper content — Oxalyldihydrazide photometric method

Magnésium et alliages de magnésium — Dosage du cuivre — Méthode photométrique à l'oxalyldihydrazide

First edition — 1976-02-01

UDC 669.721 : 546.56 : 543.4

Ref. No. ISO 794-1976 (E)

Descriptors : magnesium, magnesium alloys, chemical analysis, determination of content, copper.

Price based on 3 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the Technical Committees were published as ISO Recommendations; these documents are now in the process of being transformed into International Standards. As part of this process, Technical Committee ISO/TC 79 has reviewed ISO Recommendation R 794 and found it technically suitable for transformation. International Standard ISO 794 therefore replaces ISO Recommendation R 794-1968 to which it is technically identical.

ISO Recommendation R 794 was approved by the Member Bodies of the following countries :

Austria	Hungary	Spain
Belgium	Korea, Rep. of	Sweden
Brazil	India	Switzerland
Bulgaria	Ireland	Turkey
Canada	Israel	United Kingdom
Chile	Italy	U.S.A.
Czechoslovakia	Netherlands	U.S.S.R.
Egypt, Arab Rep. of	Norway	Yugoslavia
France	Poland	
Germany	South Africa, Rep. of	

No Member Body expressed disapproval of the Recommendation.

The Member Body of the following country disapproved the transformation of ISO/R 794 into an International Standard :

Switzerland
