Aerospace — Surface treatment of austenitic stainless steel parts

Aéronautique et espace — Traitement de surface des éléments en acier inoxydable austénitique

First edition — 1985-08-15

UDC 669.146.9 : 669.14.018.8 : 629.7

Ref. No. ISO 8074-1985 (E)

Descriptors : aircraft industry, aircraft, components, austenitic steels, stainless steels, surface treatment

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council. They are approved in accordance with ISO procedures requiring at least 75 % approval by the member bodies voting.

International Standard ISO 8074 was prepared by Technical Committee ISO/TC 20, *Aircraft and space vehicles*.
