Part 3:

Bales of cotton — Packaging and labelling

Balles —

Partie 3: Balles de coton — Emballage et étiquetage

Reference number
ISO 8115-3:1995(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 8115-3 was prepared by Technical Committee ISO/TC 72, *Textile machinery*, Subcommittee SC 1, *Spinning preparatory, spinning and doubling (twisting) machinery*.

ISO 8115 consists of the following parts, under the general title *Bales*:

- *Part 2: Bales of man-made staple fibres — Dimensions*
- *Part 3: Bales of cotton — Packaging and labelling*

NOTE 1 ISO 8115:1986 will become part 1 at the time of its next revision.
