Small craft — Remote steering systems for single outboard motors of 15 kW to 40 kW power

*Navires de plaisance — Appareils à gouverner commandés à distance
pour moteurs hors-bord uniques de puissance comprise entre 15 kW et
40 kW*

Reference number
ISO 9775:1990(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 9775 was prepared by Technical Committee ISO/TC 188, *Small craft*.

NOTE 1 This International Standard specifies requirements and test methods for remote steering systems as cited in clause 1. They are thus more specialized requirements than those given in a parallel document, ISO 8848, *Small craft — Remote steering systems*.
